**FREELANCE INTERVIEWERS NEEDED!**

The 2022 Census will consist of approximately 100 interviewers who will be tasked with collecting data on housing, health, education and labor and will visit all households in Sint Maarten.

A Census is an important tool for any country. Public entities, private institutions, schools and everyone can make good use of the collected data to set policy, plan and stay informed of developments within the community.

The success of the Census 2022 depends on the participation of the entire community and of the interviewers. It is very important for those who want to participate as interviewers that they are reliable and also suitable.

You can apply now to become a census interviewer!

**Requirements:**

- Must be at least 18 years of age
- Minimum graduate of secondary school
- Able to work directly with participants in a diplomatic fashion
- General computer skills
- Access to a cell phone
- Basic understanding of maps
- Strong interpersonal skill
- Exceptional time management skills
- Must know how to speak, read, and write in English (multiple languages are a plus)
- Driver’s license and own transportation is a plus

The Department of Statistics will provide you with training, a support system to handle any issues you may face in the field, also an attractive compensation package.

Please send your application letter and resume to statinfo@sintmaartengov.org no later than Friday July 1st, 2022.
