### Public Announcement

---

---

On a global level, the prices for crude oil continue to increase. The main reason behind the current price increase of crude oil, is caused by the continuing tense international situation involving Iran, one of the major exporters of oil. It is expected and as such observed by many global experts, that crude oil prices will remain at high prices during the coming months.

Given the aforementioned, the general public is hereby informed that as of Friday April 20, 2012 the prices of petroleum products have been adjusted as follows:

	<b>Current Price</b>	<b>New Price</b>
<b>Unleaded Gasoline (ULG)</b>	265. 00 Antillean cents/liter	<b>273.00 Antillean cents/liter</b>

**Please note:** the price for Diesel (Gasoil) remains as is: 229.00 Antillean cents/liter.
