

ST. MAARTEN

Public Announcement

The Government of St. Maarten regulates the prices of petroleum products by imposing a maximum price at which wholesalers and retailers can sell these products on St. Maarten. Due to the ongoing developments on an international level, the prices of crude oil have experienced adjustments. Taking into consideration that our local prices follow the international trend, our prices for ULG and Diesel will also experience an adjustment.

Given the aforementioned, the general public is hereby informed that as of Sunday March 16, 2014, the maximum consumer prices of the following petroleum products have been adjusted as follows:

	Current Price	New Price
Unleaded Gasoline (ULG)	2.401 Naf/liter	2.526 Naf/liter
Diesel	2.205 Naf/liter	2.198 Naf/liter

Minister of Tourism, Economic Affairs, Transport and Telecommunication
