In April 2015, the Bank continued to direct its monetary policy at tightening the surplus in the money market by auctioning more certificates of deposit (CDs). As a consequence, the amount of outstanding CDs rose by NAf.19.4 million. Meanwhile, the Bank maintained the percentage of the reserve requirement at 18.00%. Nevertheless, the amount of required reserves increased by NAf.6.7 million due to the higher base amount¹ upon which it is calculated. Base money² rose by NAf.53.9 million in April 2015 due to an increase in the current account balances of the commercial banks (NAf.43.9 million) and the currency in circulation (NAf.10.0 million). The latter is attributable to the higher demand for cash by the public during the holidays in April. The growth in the current account balances of the commercial banks was caused primarily by the net sale of foreign exchange to the Bank, explaining also the increase in the item "Official reserves" (NAf.38.2 million) at the assets side of the balance sheet. Furthermore, USONA³ transferred funds from its account at the Bank towards its account at a commercial bank. The increase in the current account balances was, however, mitigated by the higher outstanding amounts of CDs and required reserves. In addition, the Bank provided short-term liquidity to the commercial banks during the month of April 2015, reflected by an increase in the item "Claims on deposit money banks" by NAf.20.9 million. The item "Liabilities to other sectors" dropped by NAf.14.4 million. This drop was caused by a decrease of NAf.15.2 million in the item "Deposits of other residents," due mainly to the aforementioned transfers by USONA. The item "Liabilities to nonresidents" increased by NAf.18.1 million, due largely to an increase in the deposits of the Dutch Ministry of the Interior and Kingdom Relations (BZK) at the Bank related to interest payments on debt securities issued by the governments of Curaçao and Sint Maarten that are held by the Dutch State. This increase was mitigated, however, by a transfer by the Bank of part of the blocked deposits of a bank placed under the emergency measure to its account holders. Furthermore, the net position of the government with the Bank worsened by NAf.13.1 million, due mainly to the aforementioned interest payments by the governments of Curaçao and Sint Maarten. Finally, the item "Gold" on the assets side of the balance sheet decreased by NAf.5.1 million as a result of a lower market value at the balance sheet date, compared to the end of March 2015. The decrease in the item "Capital and reserves" on the liabilities side of the balance sheet was related to the drop in the market value of gold and the payment of dividend for the years 2011 - 2013 to the governments of Curaçao and Sint Maarten.
