During the month of November 2012, the Bank continued its monetary policy aimed at a tightening of the surplus in the money market. The percentage of the reserve requirement, the main instrument, was increased by 1.00 percentage point to 13.75% to mitigate the growth in private credit extension and reduce the excess liquidity in the banking system. As a result of the increased reserve requirement percentage, the amount of required reserves rose by NAf.52.8 million. The other monetary policy instrument, the auctioning of Certificates of Deposit (CDs), was not actively deployed. During the biweekly auctions, the Bank aimed only at the refinancing of maturing CDs. The amount of outstanding CDs, therefore, remained unchanged.

Base money<sup>1</sup> dropped by NAf.110.8 million during the month of November, due to a decline in the current account balances of the commercial banks at the Bank (NAf.117.8 million). The latter can be ascribed mainly to the net purchase of foreign exchange at the Bank and the rise in the required reserves. In addition, the Bank provided short-term credit to a commercial bank during the month of November 2012. As a result, the item "Claims on deposit money banks" on the assets side of the balance sheet increased by NAf.53.9 million.

The item "Deposits of nonresidents in foreign currency" declined by NAf.33.6 million due largely to transactions carried out by a commercial bank in Bonaire from its account at the Bank to abroad. These transactions, combined with the net purchase of foreign exchange by the commercial banks, resulted in the decline of the item "Official reserves" on the assets side of the balance sheet (NAf.147.6 million).
